THE NEW WAY OF MEASUREMENT

Amorph's LiDAR solution provides an improved method for tracking passengers and measuring queues. A flexible cost-effective, GDPR-compliant capability for Passenger Flow Management!

AMORPH.senses

can identify people and objects and track them in real time.

- // ANY OBJECT DETECTION AND CLASSIFICATION
- // UNSTRUCTURED QUEUE DETECTION
- // VOLUME & VELOCITY MEASUREMENT
- // AREA COVERAGE WITH FEWER DEVICES
- // LESS INFRASTRUCTURE WITH WIFI CONNECTION
- // SUPPLIER INDEPENDENT
- // DEPLOYMENT PLANNING WITH SIMULATION

USE CASES

Powerful features to boost your airport operations and make your passengers happy!

- Dynamic queue measurement e.g. for check-in
- Waiting times measurement beyond queueing area
- Observation of high-density areas
- End-to-end passenger tracking
- Security process automation

PLUG AND PLAY

BOXY

is our self-designed plug-and-play component that contains everything you need to start immediately with people and/or object-tracking projects.

It requires only a power source to make it run and instantly provide situational awareness.

We'd love to hear from you.
